**Color:** Amber

**Buttons:** Round, surface mounted steel. Markings on the symbol plate beside the button, optionally braille available (EN81-71, Category 1)

**Fixing type:** Flush mounted with KONE shield screws.
KSS 140 functions and features

Dual function emergency symbols
The integrated emergency symbols have a dual function, working as an emergency light and as a call connection sequence indicator.

Emergency connection indicators
The amber alarm bell symbol lights up when the alarm button is pressed. The symbols light up step by step showing the progression of the call. When the green light is on, the call is connected to the emergency call center.

Durable faceplates
The textured faceplates conceal scratches and keep the devices in good condition for longer. In addition they offer attractive design features for both new and existing elevators.

Emergency light
In case of a power failure the symbols are backlit with bright light, illuminating the car and ensuring the instructions are clearly visible for persons trapped in the car.

Shielded display units
The display units are shielded by an impact resistant metal mesh and transparent, fire resistant plastic covers.
Landing signalizations

Display
- All devices are impact, scratch and burn resistant.
- The displays are covered by a strong steel mesh.
- The cutouts for the display lights are filled with fire resistant transparent plastic.
- Available in variable dimensions to fit existing faceplate spaces.
